Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-10 and 15-23, drawn to the cable handling trailer system, classified in class 242, subclass 390.5.
- II. Claims 11-14, drawn to the dumpster assembly, classified in class 414, subclass 546.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions use the same trailer but not at the same time. Note that the reel assembly which was mounted on arms 31 has been replaced by the dumpster assembly which is also mounted on arms 31. Therefore they are not capable of being used together.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
